LINKEDIN [linkedin.com/in/caleorourke](https://www.linkedin.com/in/caleorourke)

Forward-thinking product manager with expertise in the strategic and tactical avenues for high-tech products. Solid reputation for hatching profitable strategies, aligning business and development pillars, and taking new products from concept, to development, to delivery.

Tech-savvy and analytical with 15 years experience in product and program management, web engineering, and software development. Adept at building new development initiatives and diverse portfolios for products in fast-paced Agile, DevOps, and Lean environments.

EXPERIENCE

Senior Product Manager

IBM CLOUD

2012 – Present | Dallas, Texas

Pivot product initiatives and market strategies toward developing a growing cloud computing platform. Responsible for building and launching new cloud PaaS and IaaS products in global marketplaces.

- Establish new vertical products in Bluemix, SoftLayer, and IBM marketplace catalogs
- Enact strategies to reach untapped markets and new growth opportunities
- Craft business cases, proofs-of-concept, and requirements for dev consumption
- Align technology roadmaps and P&L to drive organic growth and achieve business objectives
- Work directly with developers, designers, and customers to refine product concepts and ensure customer success and adoption

Senior Product Manager

NEOPOST ID

2003 – 2012 | Austin, Texas

Cultivated pipelines to new markets and designed offerings for new online solutions and native apps. Responsible for customer-facing SaaS, on-premise, and digital products.

- Reached new markets by transitioning native products to hosted ecosystems
- Facilitated technology refresh programs to eliminate churn and increase revenue flow
- Adopted new Agile and Product Portfolio practices, reducing time-to-market by 40%
- Managed \$25M project to transform line-of-business apps into a hosted CRM environment
- Launched storefront for purchasing Internet-enabled apps on smart devices, increasing attachment rates 30-32% each quarter

Technical Project Consultant

SPRINT NEXTEL

2000 – 2002 | Plano, Texas

Spearheaded retail launches for mobile products and provided operational support for system hardware, networks, and back-office systems.

- Ushered in technology induction programs for ION broadband, 3G, and new mobile devices
- Coordinated new firmware builds, onsite implementations, and system updates during planned/unplanned maintenance windows
- Gathered quantitative data to report failures and serviceability issues
